

REMARKS

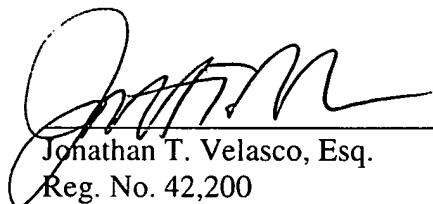

This is a divisional application of pending parent application, Serial No. 09/927,732, filed August 8, 2001. This divisional application is filed during the pendency of the parent application. By the present preliminary amendment, applicant has renumbered original duplicate claim 20 as "21" and original claims 21-40 as "22-41" and amended claims 23-40 to specify correct claim dependencies, consistent with the renumbering of claims carried out in the Office Action dated July 1, 2002 in the parent application, Serial No. 09/927,732, and, thus claims 22-41 have been designated as "currently amended" solely for that purpose; applicant has further canceled claims 1-13, 16 and claim 21 (originally duplicate claim 20) without prejudice. Accordingly, claims 14-17, 19-20 and 22-41 remain in the present Rule 1.53(b) divisional application. Consideration and examination of pending claims 14-17, 19-20 and 22-41 are respectfully requested.

A true and correct copy of the parent application, including the specification, drawings and claims, as originally filed, is enclosed. Additionally, enclosed herewith in Appendix A are proposed changes to Figures 1 and 4, highlighted in red, consistent with the changes requested by the Examiner in the Office Action dated December 4, 2002 in the parent application Serial No. 09/927,732. Specifically, the descriptive legend "Base Substrate" has been added to Box 110 in Figure 1. In Figure 4, the descriptive legend "Substrate" has been added to Box 310, and the descriptive legend "Capacitor Pad" has been added to Box 340. Applicant submits that no new matter is added nor is the scope of the invention affected by these drawing changes. Six (6) sheets of formal drawings, submitted herewith in Appendix B, incorporate the above-discussed changes to Figures 1 and 4.

Also enclosed is a true and correct copy of declaration filed in the parent application.
Please direct all correspondence and communications to the undersigned attorney of record.

Respectfully Submitted;

Dated: 12/30/03
